

# Instructions to authors

Detailed instructions to authors are available online here:  
[cambridge.org/core/journals/journal-of-glaciology/information](https://cambridge.org/core/journals/journal-of-glaciology/information)

## The *Journal of Glaciology* publishes three types of paper:

- Articles - concerning new findings and theories, or new instruments and methods, in glaciology; or review articles that offer an up-to-date, coherent account of a glaciological subject that is developing rapidly or has been neglected
- Letters - identical in form and general content to Articles, but of reduced length, and carrying substantially reduced processing charges
- Communications - short pieces without abstracts that could be, e.g., comments on published articles/letters, book reviews, or short correspondence on topics of interest to the community

## Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

## Length

Papers should be concise. Lines and pages should be numbered. Letters are limited to five *Journal* pages (one *Journal* page = about 1000 words).

## Original submission

Submit your paper via the *Journal of Glaciology* online submission system at <https://mc.manuscriptcentral.com/jog>

## Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct (you will have to pay for any substantial alterations made at this stage).

## Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
  - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
  - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

## Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

## General points

- Title should be concise
- Abstract should be less than 200 words

- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
  - be one or two column widths: up to 85 mm or up to 178 mm
  - not be in boxes
  - use strong black lines (avoid tinting if possible)
  - use SI units in labels
  - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
  - be set in MathType or advanced equation editor
  - NOT be embedded as graphics in the text
- Tables should
  - be numbered in Arabic
  - be referred to in text (as Table 1 etc.)
  - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
  - be concise
  - be complete and accurate, including doi numbers
  - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
  - be arranged in alphabetical order by first author's surname
  - include works accepted but not published as 'in press'
  - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

## Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,320 for a regular article (of 6 published pages or more), £660 for a letter (of 5 published pages or fewer) and communications (of 2 published pages or fewer). IGS members receive a 10% discount on these charges.

Figures quoted here are correct for 2019.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

# Journal of GLACIOLOGY

## CONTENTS Vol 65 No 254 2019

873–888 Identifying and mapping very small ( $<0.5 \text{ km}^2$ ) mountain glaciers on coarse to high-resolution imagery

J. R. Leigh, C. R. Stokes, R. J. Carr, I. S. Evans, L. M. Andreassen, D. J. A. Evans

889–899 Non-linear flow modelling of a Martian Lobate Debris Apron

Louise Steffensen Schmidt, Christine Schøtt Hvidberg, Jung Rack Kim, Nanna Bjørnholt Karlsson

900–911 Long-term observations of supraglacial streams on an Arctic glacier

Sarah L. St Germain, Brian J. Moorman

912–925 Seasonal and spatial variations in the ocean-coupled ambient wavefield of the Ross Ice Shelf

Michael G. Baker, Richard C. Aster, Robert E. Anthony, Julien Chaput, Douglas A. Wiens, Andrew Nyblade, Peter D. Bromirski, Peter Gerstoft, Ralph A. Stephen

926–939 Spectral reflectance behavior of different boreal snow types

Henna-Reetta Hannula, Jouni Pulliainen

940–956 Light-absorbing impurities in snow cover across Northern Xinjiang, China

Xinyue Zhong, Shichang Kang, Wei Zhang, Junhua Yang, Xiaofei Li, Yulan Zhang, Yajun Liu, Pengfei Chen

957–970 Testing and application of a model for snow redistribution (Snow\_Blow) in the Ellsworth Mountains, Antarctica

Stephanie C. Mills, Anne M. Le Brocq, Kate Winter, Michael Smith, John Hillier, Ekaterina Ardarkova, Clare M. Boston, David Sugden, John Woodward

971–982 Automatic mapping and geomorphometry extraction technique for crevasses in geodetic mass-balance calculations at Haig Glacier, Canadian Rockies

Marzieh Foroutan, Shawn J. Marshall, Brian Menounos

983–988 Layer optimized SAR processing and slope estimation in radar sounder data

Davide Castelletti, Dustin M. Schroeder, Elisa Mantelli, Andrew Hilger

989–999 Crevasse initiation and history within the McMurdo Shear Zone, Antarctica

Lynn Kaluzienski, Peter Koons, Ellyn Enderlin, Gordon Hamilton, Zoe Courville, Steven Arcone

1000–1010 Modelling a paleo valley glacier network using a hybrid model: an assessment with a Stokes ice flow model

Michael A. Imhof, Denis Cohen, Julien Seguinot, Andy Aschwanden, Martin Funk, Guillaume Jouvet

1011–1022 Orthogonal experimental research on the structural parameters of a novel drill bit used for ice core drilling with air reverse circulation

Pinlu Cao, Qi Zhao, Zhuo Chen, Hongyu Cao, Baoyi Chen

1023–1034 Constraining the geothermal heat flux in Greenland at regions of radar-detected basal water

Soroush Rezvanbehbahani, Leigh A. Stearns, C. J. van der Veen, Gordon K. A. Oswald, Ralf Greve

1035–1043 Isotopic variations of meltwater from ice by isotopic exchange between liquid water and ice

Ji-Young Ham, Soon Do Hur, Won Sang Lee, Yeongcheol Han, Hyejung Jung, Jeonghoon Lee

Published for the International Glaciological Society, Cambridge, UK
