**Some Things Invent Themselves.
Others Take a Little More Effort.**

Congress Was One of Them.

Inventing Congress
Origins and Establishment of
the First Federal Congress

*Edited by Kenneth R. Bowling and
Donald R. Kennon*

“The story of the first federal elections under the Constitution is one of hopes thwarted, of expectations shattered, of fine and high-sounding theories of politics and government that blew up in the face of those who had devised them. It is a story of a group of politicians who devised a document that,

they maintained, would provide a new basis for solving the nation’s problems and who used that document as the basis for their effort to win control of Congress, put their agenda into law, and transform the nature of American politics. And it is, finally, a story of how the new nation’s politics did not work out the way that these politicians hoped, predicted, and promised it would.”

The Making of Modern Intellectual Property Law

The British Experience 1760–1911
**Brad Sherman and
Lionel Bently**

This book is the first detailed historical account of intellectual property law. In part, it examines why intellectual property law with its subcategories of patents, copyright, designs and trade marks took the shape that it did over the course of the nineteenth century. In addition the authors deal with ways in which the law grants property status to intangibles and describe how the law came to create techniques that enabled it to recognize protectable intangibles, and the inescapable problems that have arisen from their use.

The Invention of the Passport

Surveillance, Citizenship
and the State
John Torpey

This innovative book argues that documents such as passports, internal passports and related mechanisms have been crucial in making distinctions between citizens and noncitizens. It explains how the concept of citizenship has been used over the past 200 years to delineate rights and penalties regarding property, liberty, taxes and welfare. Focusing on the United States and Western Europe, it combines theory and empirical data in questioning how and why states have established the exclusive right to authorize and regulate the movement of people.

Majority Rule or Minority Will

Adherence to Precedence on the
U.S. Supreme Court
**Harold J. Spaeth and
Jeffrey A. Segal**

This book examines the influence of precedent on the behavior of U.S. Supreme Court justices throughout the Court's history. Under the assumption that for precedent to be an influence on the behavior of justices it must lead to a result they would not otherwise have reached, the results show that when justices disagree with the establishment of a precedent, they rarely shift from their previously stated views in subsequent cases. In other words, they are hardly ever influenced by precedent. Nevertheless, the doctrine of *stare decisis* does exhibit some low level influence on the justices in the least salient of the Court's decisions. The book examines these findings in light of several leading theories of judicial decision making.

The Bondsman's Burden An Economic Analysis of the Common Law of Southern Slavery **Jenny Bourne Wahl**

Were slaves property or human beings under the law? Antebellum Southern judges designed efficient laws that protected property rights and helped slavery remain economically viable, laws that sheltered the persons embodied by that property – the slaves themselves. Unintentionally, these judges generated rules applicable to ordinary Americans. Wahl provides a rigorous, compelling economic analysis of the common law of Southern slavery, inspecting thousands of legal disputes.
