## CONTENTS

## Original Articles

- 115** Incidence of surgical infection in cefazolin 3 g versus 2 g for colorectal surgery in obese patients  
*Curtis D. Collins, Eric Hartsfield, Robert K. Cleary, Rachel M. Kenney, Michael P. Veve and Kara K. Brockhaus*
- 120** TB or not TB? Development and validation of a clinical decision support system to inform airborne isolation requirements in the evaluation of suspected tuberculosis  
*Caitlin M. Dugdale, Kimon C. Zachary, Rebecca L. Craig, Alexandra Doms, Lindsay Germaine, Chloe V. Green, Eren Gulbas, Rocio M. Hurtado, Emily P. Hyle, Michelle S. Jerry, Jacob E. Lazarus, Stephen Maxfield, Molly Paras, Katherine Swanson and Erica S. Shenoy*
- 129** Rapid whole genome characterization of antimicrobial-resistant pathogens using long-read sequencing to identify potential healthcare transmission  
*Chin-Ting Wu, William C. Shropshire, Micah M Bhatti, Sherry Cantu, Israel K Glover, Selvalakshmi Selvaraj Anand, Xiaojun Liu, Awdhesh Kalia, Todd J. Treangen, Roy F Chemaly, Amy Spallone and Samuel Shelburne*
- 136** COVID-19 outbreaks in nursing homes in Los Angeles County, March 2020–April 2022  
*Amanda van Rest, Anthony Clarke, Prabhu Gounder, Pingting (Karen) Nie, Chandana Das, CaSaundra Bush and Zachary Rubin*
- 143** Antimicrobial stewardship to reduce overtreatment of asymptomatic bacteriuria in critical access hospitals: measuring a quality improvement intervention  
*Claire E. Ciarkowski, Hannah N. Imlay, Chloe Bryson-Cahn, Jeannie D. Chan, Whitney Hartlage, Adam L. Hersh, John B. Lynch, Natalia Martinez-Paz, Emily S. Spivak, Hannah Hardin, Andrea T. White, Chaorong Wu, Valerie M. Vaughn and Zahra Kassamali Escobar*
- 150** Validation and generalizability of an asymptomatic bacteriuria metric in critical access hospitals  
*Hannah Imlay, Claire E. Ciarkowski, Chloe Bryson-Cahn, Jeannie D. Chan, Whitney P. Hartlage, Adam L. Hersh, John B. Lynch, Natalia Martinez-Paz, Emily S. Spivak, Hannah Hardin, Andrea T. White, Chaorong Wu, Zahra Kassamali Escobar and Valerie M. Vaughn*
- 156** Mixed-methods multicenter assessment of healthcare workers' knowledge, perceptions, and practices related to blood culture utilization in hospitalized adults  
*Valeria Fabre, Sara E. Cosgrove, Aaron M. Milstone, Alejandra B. Salinas, Kathleen O. Degnan, Erin B. Gettler, Laurel J. Glaser, J. Kristie Johnson, Rebekah W. Moehring, George E. Nelson, Barry Rittmann, Guillermo Rodriguez-Nava, Jonathan H. Ryder, Jorge L. Salinas, Gregory M. Schrank, Thomas R. Talbot, Trevor C. Van Schooneveld, Anastasia Wasylshyn, Anping Xie and for the Centers for Disease Control and Prevention's Prevention Epicenters Program*
- 165** Impact of diagnostic stewardship on catheter-associated urinary tract infections and patient outcomes  
*Sarah E. Sansom, Audrey Goldstein, Brian D. Stein, Michael E. Schoeny, Alexandra Seguin, Ruth Kniuksta, Alexander Tomich, Mary K. Hayden, Michael Y. Lin and John Segreti*

- 171** Sociodemographic differences in treatment of acute respiratory infections in pediatric urgent cares  
*Rana E. El Feghaly, Luis E. Sainz, Brian R. Lee, Matthew P. Kronman, Adam L. Hersh, Victoria Parente, Destani Bizune, Guillermo V. Sanchez, Rana F. Hamdy, Amanda Nedved and For REDUCE (Reducing Differences in Urgent Care Encounters – Antibiotic Choice) Collaborative*
- 180** Efficacy of copper-impregnated antimicrobial surfaces against *Clostridioides difficile* spores  
*Thanuri Navarathna, Piyali Chatterjee, Hosoon Choi, John D Coppin, Brandon Corona, Emma Brackens, Lynn Mayo, Munok Hwang, Marjory Williams, Morgan Bennett and Chetan Jinadatha*
- 187** Assessing and upgrading the cleanliness of the emergency department  
*Elisheva Levine, Samar Abo-Gush, Bath Sheva Ezagui, Ruth David, Puah Kopuit, Naama Bagrish, Todd Zalut, Marc V. Assous, Yossi Freier-Dror, Amos M. Yinnon and Shmuel Benenson*

### Concise Communications

- 193** The adoption and compliance to central line-associated bloodstream infection insertion and maintenance bundle programs in intensive care unit settings across Canada  
*Zhi Lin Zhou, Anada Silva, Kristine Cannon, Blanda Chow, Jeannette L. Comeau, Chelsey Ellis, Charles Frenette, Amir Hadzic, Jennifer Happe, Lynn Johnston, Kevin C. Katz, Jamal Khan, Joanne M. Langley, Bonita E. Lee, Santana Lee, Marie-Astrid Lefebvre, Cassandra Lybeck, Allison McGeer, Andrew Neitzel, Jennifer Parsonage, Connie Patterson, Caroline Quach, Michelle Science, Stephanie W. Smith, Nisha Thampi, Reena Titoria, Jen Tomlinson, Joseph Vayalumkal, Kathryn N. Suh, Jocelyn A. Srigley and the Canadian Nosocomial Infection Surveillance Program*
- 197** In vitro assessment of effect of initial specimen diversion device on detection of central venous catheter contamination or colonization  
*Mark E. Rupp, Paul D. Fey, Elizabeth Lyden and Luke Handke*
- 201** Using Centers for Medicare and Medicaid Services care compare data to create hospital-acquired infection count thresholds: a SAS program and analysis  
*Benjamin D. Pollock and Lorelle L. Ziegelbauer*
- 203** No “One-Size-Fits All”: chronic “Carryover” diagnoses dilute antibiotic prescribing rates for sinusitis among adults in primary and urgent care settings  
*Mary Smith, Marten Hawkins, Chananid Laikijrungs, Emily Mui, William Alegria, Thomas Leung, Alex Zimmet, David Ha and Marisa Holubar*
- 206** Impact of daily prompt to vaccinate inpatients awaiting rehabilitation against SARS-CoV-2 and influenza  
*Amber Linkenheld, Victoria R. Williams, Karen Chan, Helene Carating, Romina Marchesano, Jennifer Do, Sherri Sullivan, Danette Beechinor, William K. Silverstein and Jerome A. Leis*
- 209** Electronic evaluation of infection risk from room environment and prior room occupants: the transmission from room environment events (TREE) measure  
*Clare Rock, Yea-Jen Hsu, Aaron M. Milstone, Alejandra B. Salinas, Lisa Maragakis, Nathan Kwon, Sara E. Cosgrove, Patricia J. Simner, Zunaira Virk, Abigail H. Vorsteg, Eili Klein and For the Centers for Disease Control and Prevention’s Prevention Epicenters and MInD Programs*
- 213** Bad habits that stick: adhesive tape use practices and beliefs  
*Julia Fischer, Reva Kleppel, Manju Mathew, Morgan Gilmore, Laura Hegarty-Moore, Michele Maryanski, Stacey Peters, Kristin Smith, Steven Roncaioli, Jacob Smith, Megan C. Gallagher, Esteban DelPilar-Morales and Sarah Haessler*

### Letters to the Editor

- 216** Letter to the editor: enhancing healthcare-associated infection reporting in Canada  
*Virginie Boulanger, Sonia Shiels, Anne Bialachowski, Anne MacLaurin and Caroline Quach*

- 218** Improving the ability of psychiatric hospitals to respond to infectious disease outbreaks: lessons learned from the COVID-19 outbreak response in Ibaraki Prefecture, Japan  
*Manami Nakashita, Katsuki Kurosawa, Munehisa Fukusumi, Fujiko Irie, Minako Kanesaki, Hirofumi Kato, Hitomi Kurosu, Takuya Yamagishi, Yuuki Tsuchihashi, Matthew Griffith and Tomimasa Sunagawa*

#### Erratum

- 220** Assessing and upgrading the cleanliness of the emergency department – ERRATUM  
*Elisheva Levine, Samar Abo-Gush, Bath Sheva Ezagui, Ruth David, Puah Kopuit, Naama Bagrish, Todd Zalut, Marc V. Assous, Yossi Freier-Dror, Amos M. Yinnon and Shmuel Benenson*

*Infection Control & Hospital Epidemiology* (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA. Printed by Sheridan, a CJK Group Company.

## Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

## Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

## Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (<http://www.copyright.com>).

email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: [www.cambridge.org/about-us/rights-permissions](http://www.cambridge.org/about-us/rights-permissions).

## Subscriptions

The individual subscription prices for 2025 are: Print & Online: \$381; Online Only: \$286. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: [cambridge.org/ICHE](http://cambridge.org/ICHE).

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) (USA, Canada, and Mexico) or [journals@cambridge.org](mailto:journals@cambridge.org) (outside of USA, Canada, and Mexico).

**Postmaster:** Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

## About the cover:

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

## 2025

**Title:** *The Dynamics of Bacterial Evolution, 2020*

**Artist:** Angharad Ellen Green, PhD

**Medium:** The artwork is made up of individual Muller plots representing *Streptococcus pneumoniae* bacteria lineages that were evolved separately within nasopharynx and lung environments. The command line program muller (v0.6.0 - <https://pypi.org/project/muller/>), with default parameters applied, was used to produce genotypes and trajectories for each of the evolved lineages. These tables were then used as inputs for ggplot2 (v3.3.2) and ggmuller (v0.5.4) in R-Studio (v4.0.2), to produce Muller plots. The individual plots were then assembled to produce the resulting artwork.

### Dr. Green spoke to ICHE about her artwork.

**What was the inspiration for this artwork?** My postdoctoral research used an *in vivo* experimental evolution model to understand how *Streptococcus pneumoniae* (the pneumococcus) adapts to the lung and nasopharynx environments. The pneumococcus was experimentally evolved through a lung infection model and a nasopharynx infection model, producing independently evolved lung and nasopharynx lineages. We sequenced the evolved lineages and compared them to the ancestor to understand how their genomes had changed. This work also enabled us to determine how environmental differences between the upper and lower airways might shape pneumococcal adaptation and evolution. The resulting sequencing dataset was very large and complex with lots of interesting results. I wanted to use an effective method of visualising the data and Muller plots were chosen to display the evolutionary dynamics of mutations found in each evolved lineage over time. In these plots, each mutation is grouped as a genotype, which is represented by a different colour, and the blocks of colour expand when the genetic changes make the bacteria better able to survive in their local conditions. After completing the data analysis and publishing this work, I created this artwork as a memento of my postdoctoral research and I have a canvas of this work hanging in my apartment. Additionally, I wanted to demonstrate how scientific artwork can help visualise the complexities of evolution dynamics and help us to better understand bacterial processes.

**What is your personnel connection to the content of ICHE?** Throughout my career as a microbiologist, I have carried out research to investigate bacterial pathogenesis and antimicrobial resistance (AMR) of WHO-defined bacterial priority pathogens, such as *Pseudomonas aeruginosa*, methicillin-resistant *Staphylococcus aureus* (MRSA) and *Streptococcus pneumoniae*. I have actively promoted the importance of microbial genomic research to confront current global challenges, such as AMR and healthcare-acquired infections. I have championed microbiology research through my various roles in academia, volunteering on the Microbiology Society's Policy Committee and as a Research Manager at the Healthcare Infection Society. It is an honour for my bacterial evolution artwork to be on the cover of ICHE.

**Given the scope of the journal, why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?** This artwork is made up of a collection of graphs called Muller plots, which are used to visualize how bacteria evolve when grown in diverse environments. The colours represent genetic changes that have taken place in the presence of environmental factors, such

---

Cover image: *The Dynamics of Bacterial Evolution, 2020*

as antimicrobials and the host immune system. The dynamics of evolution are complex and being able to visualise this process enables scientists to better understand bacterial processes, including the development of AMR. This artwork is appropriate for the cover of ICHE as it was created as a direct result of scientific research into how bacteria can adapt and evolve in diverse host niches to cause disease. Additionally, this artwork makes it possible for scientists to visualise the complexities of the dynamics of evolution and comprehend how bacteria adapt to different host environments.

*Dr. Green is a Senior Research Data Steward in the Advanced Research Computing Centre (ARC) at UCL in London. Her postdoctoral research at the University of Liverpool was supported by a Sir Henry Dale Fellowship, awarded by the Wellcome Trust and the Royal Society (grant number 204457/Z/16/Z) to Dr. Daniel R Neill. The research from which this artwork was derived was published in Molecular Biology and Evolution (Green AE, Howarth D, Chaguza C, et al. Pneumococcal colonization and virulence factors identified via experimental evolution in infection models. Mol Biol Evol 2023; 38: 2209-2226).*
