**Bridget M. Ogilvie** *Wellcome Trust, London, England*

*Parasite Immunology* is an international journal devoted to research on parasite immunology in the general sense. Emphasis is placed on how hosts control parasites, and the immunopathological reactions which take place in the course of parasitic infections. The journal welcomes original work on all parasites: helminths, fungi, protozoa, ectoparasites, bacteria and viruses. Each issue covers the spectrum of parasite immunology through the original papers published, and through 'viewpoint' articles, designed to interest as well as instruct.

## Subscription Information

*Parasite Immunology* is published bi-monthly. Subscription rates for 1987 are £109.00 (UK), \$225.00 (USA, Canada & Japan), £131.00 (elsewhere) post free.
