Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.

CONTENTS

Original Articles

- 381** Assessing coronavirus disease 2019 (COVID-19) transmission to healthcare personnel: The global ACT-HCP case-control study
Robert J. Lentz, Henri Colt, Heidi Chen, Rosa Cordovilla, Spasoje Popevic, Sarabon Tahura, Piero Candoli, Sara Tomassetti, Gerard J. Meachery, Brandon P. Cohen, Bryan D. Harris, Thomas R. Talbot and Fabien Maldonado
- 388** Healthcare personnel absenteeism, presenteeism, and staffing challenges during epidemics
Douglas W. Challener, Laura E. Breeher, JoEllen Frain, Melanie D. Swift, Pritish K. Tosh and John O'Horo
- 392** Seroprevalence of severe acute respiratory syndrome coronavirus-2 (SARS-CoV-2) infection among Veterans Affairs healthcare system employees suggests higher risk of infection when exposed to SARS-CoV-2 outside the work environment
Derek E. Dimcheff, Richard J. Schildhouse, Mark S. Hausman, Jr., Brenda M. Vincent, Erica Markovitz, Stephen W. Chensue, Jane Deng, Melissa McLeod, Danielle Hagan, Jon Russell and Suzanne F. Bradley
- 399** Patient characteristics and admitting vital signs associated with coronavirus disease 2019 (COVID-19)-related mortality among patients admitted with noncritical illness
Kenneth E. Sands, Richard P. Wenzel, Laura E. McLean, Kimberly M. Korwek, Jonathon D. Roach, Karla M. Miller, Russell E. Poland, L. Hayley Burgess, Edmund S. Jackson and Jonathan B. Perlin
- 406** Impact of the coronavirus disease 2019 (COVID-19) pandemic on nosocomial *Clostridioides difficile* infection
Manuel Ponce-Alonso, Javier Sáez de la Fuente, Angela Rincón-Carlavilla, Paloma Moreno-Nunez, Laura Martínez-García, Rosa Escudero-Sánchez, Rosario Pintor, Sergio García-Fernández and Javier Cobo
- 411** VanA rectal swab screening as a predictor of subsequent vancomycin-resistant enterococcal bloodstream infection in critically ill adults
Shawn J. Kram, Bridgette L. Kram, Jennifer M. Schultheis, Michelle M. Kuhrt, Andrew S. McRae and Deverick J. Anderson
- 417** Increase in surgical site infections caused by gram-negative bacteria in warmer temperatures: Results from a retrospective observational study
Seven Johannes Sam Aghdassi, Petra Gastmeier, Peter Hoffmann and Frank Schwab
- 425** Use of simulations to evaluate the effectiveness of barrier precautions to prevent patient-to-patient transfer of healthcare-associated pathogens
Heba Alhmidi, Daniel F. Li, Jennifer L. Cadnum, Muhammed F. Haq, Natalia C. Pinto-Herrera, Brigid M. Wilson and Curtis J. Donskey

- 431** Alcohol-impregnated caps and ambulatory central-line–associated bloodstream infections (CLABSIs): A randomized clinical trial
Aaron M. Milstone, Carol Rosenberg, Gayane Yenokyan, Danielle W. Koontz, Marlene R. Miller and for the CCLIP Authorship Group
- 440** “There is no one to pick up the pieces”: Sustainability of antibiotic stewardship programs in nursing homes
Sandhya Seshadri, Christina B. Felsen, Craig R. Sellers and Ghinwa K. Dumyati
- 448** Targeted gown and glove use to prevent *Staphylococcus aureus* acquisition in community-based nursing homes: A pilot study
Alison D. Lydecker, Patience A. Osei, Lisa Pineles, J. Kristie Johnson, Jacquelyn Meisel, O. Colin Stine, Laurence Magder, Ayse P. Gurses, Joan Hebden, Cagla Oruc, Lona Mody, Kara Jacobs Slifka, Nimalie D. Stone and Mary-Claire Roghmann

Commentaries

- 455** Local, state and federal face mask mandates during the COVID-19 pandemic
Judith A. Guzman-Cottrill, Anurag N. Malani, David J. Weber, Hilary Babcock, Sarah D. Haessler, Mary K. Hayden, David K. Henderson, Rekha Murthy, Clare Rock, Trevor Van Schooneveld, Sharon B. Wright, Corey Forde, Latania K. Logan for the SHEA Board of Trustees
- 457** Lessons learned in infection prevention for Ebola virus disease and the coronavirus disease 2019 (COVID-19) pandemic—Principles underlying prevention
Erica S. Shenoy and David J. Weber

Concise Communication

- 461** Effect of testing methods on incidence of *Clostridioides difficile* infection rates in Veterans’ Affairs medical centers
Brian P. McCauley, Martin E. Evans, Loretta A. Simbartl, Shantini D. Gamage, Stephen M. Kralovic and Gary A. Roselle
- 464** Impact of preoperative chlorhexidine gluconate (CHG) application methods on preoperative CHG skin concentration
Bobby G. Warren, Alicia Nelson, David K. Warren, Meghan A. Baker, Candace Miller, Tracey Habrock, Jahnvi Bongu, Abinav Gowda, Jacob Johnson, Deverick J. Anderson and CDC Prevention Epicenters Program
- 467** Surgeon choice in the use of postdischarge antibiotics for prophylaxis following mastectomy with and without breast reconstruction
David K. Warren, Katelin B. Nickel, Christopher J. Hostler, Katherine Foy, Jennifer H. Han, Pam Tolomeo, Ian R. Banks, Victoria J. Fraser and Margaret A. Olsen for the CDC Prevention Epicenter Program
- 471** Successful termination of an outbreak of *Mycobacterium chimaera* infections associated with contaminated heater-cooler devices
Alexandre R. Marra, Daniel J. Diekema and Michael B. Edmond

474 Quantitative characterization of high-touch surfaces in emergency departments and hemodialysis facilities
Tina Z. Wang, Matthew S. Simon, Lars F. Westblade, Lisa Saiman, E. Yoko Furuya and David P. Calfee

477 Does a mobile dust-containment cart reduce the risk of healthcare-associated fungal infections during above-ceiling work?
Mark O. Buchanan, Sharon C. Thompson, Lauren M. DiBiase, Emily E. Sickbert-Bennett and David J. Weber

480 The impact of isolation precautions on caregiver-infant interactions in the neonatal intensive care unit: A case-control study
Rebekah C. Gardea, Matthew Petershack and Joseph B. Cantey

Research Brief

483 Validation of Centers for Disease Control and Prevention level 3 risk classification for healthcare workers exposed to severe acute respiratory coronavirus virus 2 (SARS-CoV-2)
Candace M. Gragnani, Priyanka Fernandes and Daniel A. Waxman

485 Occupational exposures in US obstetrics and gynecology resident physicians
Alison A. Garrett and Harold C. Wiesenfeld

487 Infectious disease screening lab panel for homeless patients: A retrospective review at a large academic health system
Kusha Davar, Mary Noli Pilkington, Jessica Powers, Ashley Busuttil, Roger Lee and Daniel Uslan

Letters to the Editor

489 Overcoming COVID-19: Addressing the perception of risk and transitioning protective behaviors to habits
Mohamad G. Fakih, Lisa K. Sturm and Rand R. Fakih

490 Lessons learned responding to the COVID-19 pandemic
Anna C. Sick-Samuels

491 Risk following a severe acute respiratory coronavirus virus 2 (SARS-CoV-2) exposure from a nocturnal hemodialysis patient utilizing continuous positive airway pressure (CPAP)
Christopher F. Lowe, Mercedeh Kiaii, Laila Aparicio, Leila Chinybaeva, Sandy Coughlin, Inna Sekirov, Muhammad G. Morshed and Victor Leung

493 Using an air purifier as a supplementary protective measure in dental clinics during the coronavirus disease 2019 (COVID-19) pandemic
Bin Zhao, Na An and Chen Chen

494 Contamination of filtering face piece 3 masks with SARS-COV-2 during endotracheal intubation
Alice Bone, Elizabeth Barton, Shirley Hoskins, Abigail Holborow, Claire Johnston, Ian Blyth, Jonathan Evans and Brendan Healy

- 495** COVID-19: Defining an invisible enemy within healthcare and the community
Saif A. Musa, Anand Sivaramakrishnan, Stephanie Paget and Husam El-Mugamar
- 497** Lack of transparency during the COVID-19 pandemic: Nurturing a future and more devastating crisis
Alain Braillon
- 498** RT-PCR tests for SARS-CoV-2 processed at a large Italian Hospital and false-negative results among confirmed COVID-19 cases
Francesca Valent, Anna Doimo, Giada Mazzilis and Corrado Pipan
- 499** Severe complicated influenza declined during the prevention of COVID-19 in Taiwan
Chih-Jen Yang, Tun-Chieh Chen, Shin-Huei Kuo, Min-Han Hsieh and Yen-Hsu Chen
- 501** Influence of different definitions of central venous catheter-related bloodstream infections on epidemiological parameters in cancer patients
Enrico Schalk, Maria J.G.T. Vehreschild and Lena M. Biehl
- 503** Regional and statewide antibiograms as targeted interventions against antibiotic resistance
John G Plante, Hana R Winders, P. Brandon Bookstaver, Majdi N Al-Hasan, Julie Ann Justo, Katie S Waites and Sharon Weissman
- 505** Zoonotic brucellosis from the long view: Can the past contribute to the present?
Robin Bendrey and Guillaume Fournié

Infection Control & Hospital Epidemiology (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may

be obtained from the Copyright Clearance Center (<http://www.copyright.com>, email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription rate for 2021 is \$296. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Starting in 2015, the cover format of each volume of *Infection Control and Hospital Epidemiology* will be changed in order to honor one of the many professionals throughout history who not only recognized how disease might be spread, but also how those principles could be applied to reduce healthcare associated infections.

Wu Lien-teh, M.D., MPH was born Gnoh Lean Tuck in Malaysia in 1879. His father, who was Chinese, immigrated to Penang to work as a goldsmith. In 1896, Wu won the Queen's Scholarship allowing him to enroll at Emmanuel College in Cambridge University. After training at St. Mary's Hospital in London, Wu pursued research at the Liverpool School of Tropical Medicine, the Pasteur Institute, and the Bacteriological Institute of Halle in the fields of bacteriology, malaria, and tetanus. By the age of 24, Dr. Wu was the first student of Chinese descent to graduate from Cambridge with a medical degree.

Dr. Wu returned to Malaysia in 1903, to find that there were no posts in the Medical Service for non-British specialists. After a brief time studying beri-beri, he returned to Penang to establish a medical practice. He advocated for the abolition of gambling, spirits and opium which impacted local government coffers. Wu soon found himself to be in possession of an ounce of opium for which he was prosecuted. In 1907, Wu left Malaysia to accept an invitation to serve as the Vice-Director of Imperial Army Medical College in Tientsin, China.

In 1910, an outbreak of a rapidly fatal respiratory disease occurred in the Chinese-Russian town of Harbin in Manchuria. The outbreak began amongst 10,000 hunters who stayed in crowded inns; they sought marmots for their pelts which, when appropriately dyed, could pass for sable. Wu, being conversant in French and German, was dispatched to work with foreign medical officers. No one had seen pneumonic plague in recent memory, but Dr. Wu strongly suspected the diagnosis and had to overcome Chinese prohibitions against performing postmortems to prove it. With his direction, travel was restricted, plague hospitals were built and the symptomatic isolated, their homes were disinfected, and asymptomatic contacts were identified and quarantined in freight cars. Bodies that could not be buried in the frozen soil were cremated contrary to the teachings of Confucianism. Everyone was encouraged to wear anti-plague masks, the forerunner of the N95 mask. One senior physician who notably refused to wear a mask died of the disease. By the Lunar New Year in 1911, the outbreak had ceased; 60,000 inhabitants had died.

Dr. Wu was nominated for the Nobel Prize for his work as a plague fighter; he directed the National Quarantine Service and was the first president of the China Medical Society. He also championed the modernization of Chinese Medical and Public Health Systems. After the Japanese occupation of China in 1937, he returned to Malaysia where he practiced medicine until retirement at the age of 80. Dr. Wu Lien-teh died on January 20, 1960 following a stroke.
