

CAMBRIDGE

## New Titles in Functional Programming from Cambridge!

### **Building Parallel, Embedded, and Real-Time Applications with Ada**

John W. McCormick, Frank Singhoff,  
and Jérôme Hugues

“By providing an extensive foundation for real-time and embedded systems programming, this book serves a much-needed role for both students and professional alike. Students will benefit from the clarity of the text and the many straight-forward examples. Professional developers will benefit from the breadth of material showing how to harness multi-core and multi-processor platforms effectively, with a mainstream, industrial-strength concurrent programming language. The accessibility and readability provided by the Ada language make it ideal for such a book, even for those not using Ada at present. As the owner of more than forty books on Ada and many years of embedded/real-time systems development, I am happy to recommend this one and look forward to its publication.”

—Patrick Rogers, *AdaCore*

\$90.00: Hb: 978-0-521-19716-8: 386 pp.

### **Software Modeling and Design UML, Use Cases, Patterns, and Software Architectures**

Hassan Gomaa

“Software modeling continues to dominate as a method of choice for practitioners to gain an in-depth understanding of complex systems. Gomaa’s book stands out from other titles on software modeling in both its breadth and depth of coverage. Its detailed case studies are second to none when it comes to really seeing how modeling can be applied in practice.”

—Jon Whittle, *Lancaster University*

\$75.00: Hb: 978-0-521-76414-8: 592 pp.

### **Finite and Algorithmic Model Theory**

*Edited by* Javier Esparza, Christian Michaux,  
and Charles Steinhorn

*London Mathematical Society Lecture Note Series*

**Contents & Contributors:** Preface *Javier Esparza, Christian Michaux and Charles Steinhorn*; Automata-based presentations of infinite structures *Vince Bárány, Erich Grädel and Sasha Rubin*; Logical aspects of spatial databases *Bart Kuijpers and Jan Van den Bussche*; Some connections between finite and infinite model theory *Vera Koponen*; Algorithmic meta-theorems *Stephan Kreutzer*; Definability in classes of finite structures *H. Dugald Macpherson and Charles Steinhorn*; Model theoretic methods for fragments of FO and special classes of (finite) structures *Martin Otto*.

\$65.00: Pb: 978-0-521-71820-2: 356 pp.

### **Lectures in Game Theory for Computer Scientists**

*Edited by* Krzysztof R. Apt  
and Erich Grädel

\$72.00: Hb: 978-0-521-19866-0: 308 pp.

### **Pearls of Functional Algorithm Design**

Richard Bird

\$60.00: Hb: 978-0-521-51338-8: 290 pp.

### **Transitions and Trees An Introduction to Structural Operational Semantics**

Hans Hüttel

\$99.00: Hb: 978-0-521-19746-5: 290 pp.

\$50.00: Pb: 978-0-521-14709-5

## INSTRUCTIONS TO AUTHORS

### *Scope*

Papers may describe original technical work, survey an area, or present a tutorial; and may be either short or long. Anything related to functional programming is of interest, including: *foundations* (semantics, abstract interpretation, lambda calculi, rewriting, logic, type theory, category theory); *implementation* (compilation, architectures, parallelism, garbage collection, I/O, debugging, profiling); *linguistics* (pure and impure language features, non-determinism, side effects, logical variables, relation to other programming paradigms, proofs about programs, program transformation, program synthesis, partial evaluation); *applications* (applications programs, practical experience, programming techniques, prototyping).

### *Book Reviews*

Books for review, or suggestions for reviews, should be sent to the reviews editor, Simon Thompson (address on inside front cover).

### *Submission of manuscripts*

Papers may be submitted to the Editors-in-Chief or any of the editors or directly to JFP-ed@cambridge.org. Please choose an Editor whose research interests most closely match your paper; if in doubt, send your paper to one of the Editors-in-Chief. E-mail and postal addresses for the editors appear on the inside front cover.

Please refer to journals.cambridge.org/JFP for all detailed information associated with the submission of papers to the journal.

### *Offprints*

No paper offprints are provided, but a pdf of the published article will be sent to the corresponding author.

### *Incremental Publishing and DOIs*

The Journal of Functional Programming now publishes articles as First View (at Cambridge Journals Online: journals.cambridge.org) as soon as author corrections have been completed and before they join a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI—the Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. journals.cambridge.org/JFP

### SUBSCRIPTIONS

*Journal of Functional Programming* (ISSN: 0956-7968 print, 1469-7653 electronic) is published in six parts in 2011, January, March, May, July, September and November. The subscription price (excluding VAT) of Volume 21, 2011, is £375 net (USA, Canada and Mexico US\$610) institutions print and electronic; institutions electronic only is £350, \$560; individuals print only is £105, \$165; Member rates available—please enquire; single parts cost £60 net (USA, Canada and Mexico US\$120) plus postage. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Orders, which must be accompanied by payment, may be sent to any bookseller, subscription agent or to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, New York 10994–2133. Prices include delivery by air where appropriate. Application to mail at periodicals postage rates is pending at New York, NY and at additional mailing offices. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan. Postmaster: send address changes in USA, Canada and Mexico to *Journal of Functional Programming*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994–2133. Claims for missing issues should be made immediately on receipt of the subsequent issue.

### COPYING

This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA, 01923, USA. Organisations in the USA who are also registered with the C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of \$16. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0956-7968/11 \$16.

Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions.

*ISI Tear Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorised to supply single copies of separate articles for private use only.

*For all other use*, permission should be sought from Cambridge or the American branch of Cambridge University Press.

VOLUME 21 PART 3 MAY 2011

CONTENTS

FUNCTIONAL PEARL	
Typed quote/antiquote or: Compile-time parsing	
RALF HINZE	219
Structural recursion with locally scoped names	
ANDREW M. PITTS	235
Balancing weight-balanced trees	
YOICHI HIRAI AND KAZUHIKO YAMAMOTO	287
A combinator library for the design of railway track layouts	
BARNEY STRATFORD	309
