Polar and Glaciological Abstracts

A new abstracting journal produced by the Scott
Polar Research Institute, replacing *Recent Polar
and Glaciological Literature*, the widest-circulation
bibliography devoted to polar subjects

* provides wide, *annotated* coverage of books,
papers, reports and reviews on all aspects of
polar life and science, both Arctic and Antarctic

* subject, author and geographic indexes will
cumulate annually

ARCTIC MEDICAL RESEARCH

**Published by the Nordic Council for Arctic Medical Research
and the International Union for Circumpolar Health**

Chief Editors: J.P. Hart Hansen, Copenhagen and Bent Harvald, Odense

**Arctic Medical Research is the only international journal in
the area of arctic medicine and circumpolar health.**

Contents in Vol. 50, No. 1, 1991:

EDITORIAL

MEDICAL SCIENCE

Mortality among Swedish reindeer breeding Lapps in 1961-85

Kerstin Wiklund, Lars-Erik Holm and Gunnar Eklund

Pedigree analysis of sucrose intolerance among native Alaskans

Robert J. Meier, Harold Draper and Frederick Milan

Ecological and physiological aspects of transit work

S.G. Krivoschekov

Diphyllobothriasis: Fish tapeworm disease in the circumpolar North

M.A. Curtis and G. Bylund

Some consequences of polar stress. Data from a transpolar ski-trek

Roy J. Shephard

ARCTIC MEDICAL HISTORY

Inuit write about illness; standing on thin ice

Robin McGrath

GENERAL INFORMATION

International Arctic Science Committee (IASC)

Third Northern Regions Conference

Seventh Inuit Studies Conference. Abstracts from the Symposium on
Health, Healing and Medical Issues

Prospects of Soviet-American Cooperation in Circumpolar medicine and ecology

Soviet-Indian cooperation in circumpolar medicine

Antarctic Bibliography

Back issues

For vols 1-23 inclusive apply to Bluntisham Books, Oak House, East Street, Bluntisham, Huntingdon, PE17 3LS, UK. For vols 24 onward apply to Cambridge University Press, UK or USA.

Advertising

Prices appear in the advertisements section; for details apply to the Editor or to the publishers.

Advice to contributors

Polar Record publishes original articles (2000 to 8000 words) and notes (usually less than 2000 words) of current and historic polar interest. Manuscripts, maps and photographs are accepted on the understanding that they are original, do not infringe copyright, and are not currently being offered elsewhere. Receipt is acknowledged; manuscripts are submitted to referees and any rejected will normally be returned to the author within six to eight weeks. Where the subject matter is appropriate, the Editor is usually prepared to advise authors on ways of making their material acceptable.

Presentation

Typescripts should be double-spaced with 3 cm margins, on one side only of A4 or similar paper. Send two copies and keep one for reference. Give name, affiliation and address of each author on the title page, noting which author the Editor corresponds with. Follow the style of articles and notes in the most recent issue of *Polar Record*.

Articles should start with an abstract of 150–250 words and a table of major headings; secondary and tertiary headings are not listed. Indicate in margins where tables and illustrations fit. Footnotes are discouraged; places where they are considered essential are marked in text with a superscript number, and the footnotes are listed at the end before the References.

Notes are short articles, generally of less than 2000 words. They do not require an abstract or table of headings, but either the first or the final paragraph should summarize the content.

References (essential ones only, please) are cited in text; full references appear in the listing under References at the end; for forms of citations and references see the most recent issue of *Polar Record*. *Authors alone are responsible for the accuracy of their references*. References to privately printed or other unpublished reports and data are not accepted unless copies of the material are freely available from a named library or similar repository. *Tables* should be kept as simple as possible and typed on separate sheets. They will normally be fitted across the single- or double-column page, only exceptionally lengthwise.

Illustrations. Drawings, maps and diagrams must be of professional standard, with lettering and numbers pencilled in clearly. Authors may be charged for re-drawing if an illustration is inadequate. They should if possible allow for about one-third reduction in width to fit a column (7.8 cm) or page (16.4 cm). Photographs (black and white only) that add substantially to the material are welcome. Glossy prints with high contrast, about one-third oversize, generally reproduce well.

Contributions on disc

The Editor welcomes contributions on floppy discs. The most suitable format is Apple Macintosh 3.5" disc. Output from a wide variety of word processing packages can be accepted, but in case of doubt, a MacWrite-compatible document should be produced. Diagrams also can be transferred on Macintosh discs. Discs from other microcomputers may be acceptable if the text is in the form of an ASCII file, with no word processing codes. TAB characters are acceptable. Currently, *Polar Record* can accept discs from Acorn BBC and Torch microcomputers, Amstrad PCW series microcomputers and, less readily, IBM PC compatible machines (5.25" discs only). If in doubt, please consult the Editor.
