Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 18, 2015 (18 issues):
Internet/print package: £1276/\$2448 Americas only/€2045 EU only
Internet only: £924/\$1752 Americas only/€1469 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

Socio-economic inequalities in diet and body weight: evidence, causes and intervention options
G Turrell and S Vandevijvere 759

HOT TOPIC - Socioeconomic inequalities

Associations between socio-economic status and school-day dietary intake in a sample of grade 5–8 students in Vancouver, Canada
N Ahmadi, JL Black, CE Velazquez, GE Chapman and G Veenstra 764

Family sociodemographic characteristics as correlates of children's breakfast habits and weight status in eight European countries. The ENERGY (European Energy balance Research to prevent excessive weight Gain among Youth) project
Y Manios, G Moschonis, O Androutsos, C Filippou, W Van Lippevelde, FN Vik, SJ te Velde, N Jan, A Dössegger, E Bere, D Molnar, L Moreno, M Chinapaw, I De Bourdeaudhuij and J Brug on behalf of the ENERGY Consortium 774

Prevalence and association of female weight status and dietary habits with sociodemographic factors: a cross-sectional study in Saudi Arabia
A Khalaf, A Westergren, V Berggren, Ö Ekblom and HM Al-Hazzaa 784

The role of perceived barriers in explaining socio-economic status differences in adherence to the fruit, vegetable and fish guidelines in older adults: a mediation study
SC Dijkstra, JE Neter, MM van Stralen, DL Knol, IA Brouwer, M Huisman and M Visser 797

Socio-economic and behavioural determinants of fruit and vegetable intake in Moroccan women
E Landais, A Bour, A Gartner, F McCullough, F Delpeuch and M Holdsworth 809

Temporal trends in BMI in Argentina by socio-economic position and province-level economic development, 2005–2009
PJ Christine, AV Diez Roux, JJ Wing, M Alazraqi and H Spinelli 817

Nutrieconomic model can facilitate healthy and low-cost food choices
L Primavesi, G Caccavelli, A Ciliberto and E Pauze 827

Monitoring and surveillance

Vitamin B₁₂ serostatus in Colombian children and adult women: results from a nationally representative survey
OF Herrán, JB Ward and E Villamor 836

Food insecurity among veterans of the US wars in Iraq and Afghanistan
R Widome, A Jensen, A Bangerter and SS Fu 844

Assessment and methodology

Relationship between 24 h urinary potassium and diet quality in the adult Spanish population
E Rodríguez-Rodríguez, RM Ortega, PA Carvajales and LG González-Rodríguez 850

Are context-specific measures of parental-reported physical activity and sedentary behaviour associated with accelerometer data in 2–9-year-old European children?
V Verbestel, S De Henauw, K Bammann, G Barba, C Hadjigeorgiou, G Eiben, K Konstabel, E Kovács, Y Pitsiladis, L Reisch, AM Santaliestra-Pasías, L Maes and I De Bourdeaudhuij, on behalf of the IDEFICS Consortium 860

Maternal perception of malnutrition among infants using verbal and pictorial methods in Kenya
MK Mwangome, G Fegan, AM Prentice and JA Berkley 869

Household food insecurity: a systematic review of the measuring instruments used in epidemiological studies
ES Marques, ME Reichenheim, CL de Moraes, MML Antunes and R Salles-Costa 877

Nutritional epidemiology

A profile of New Zealand 'Asian' participants of the 2008/09 Adult National Nutrition Survey: focus on dietary habits, nutrient intakes and health outcomes
SM Parackal, C Smith and WR Parnell 893

Dietary patterns and whole grain cereals in the Scandinavian countries – differences and similarities. The HELGA project
D Engeset, D Hofoss, LM Nilsson, A Olsen, A Tjønneland and G Skeie 905

Dietary supplement use among participants of a databank and biorepository at a comprehensive cancer centre
L Luc, C Baumgart, E Weiss, L Georger, CB Ambrosone, G Zirpoli and SE McCann 916

Associations between low consumption of fruits and vegetables and nutritional deficiencies in Brazilian schoolchildren
RA Augusto, F Kobayashi and MA Cardoso for the ACTION Study Team 927

Public policies

Literature research of the Nutrition Improvement Programme for Rural Compulsory Education Students in China
F Zhang, X Hu, Z Tian, Q Zhang and G Ma 936

A life-cycle approach to food and nutrition security in India
RK Rai, S Kumar, M Sekher, B Pritchard and A Rammohan 944
