

Introducing...

Experimental Agriculture

Editor: F. G. H. Lupton, OBE, Cambridge

Experimental Agriculture publishes the results of analytical research into the agronomy of crops, particularly the food, forage and industrial crops of the warmer regions of the earth. It is especially concerned with experimental work conducted in the field and is designed to explain agronomic results in biological and environmental terms.

The journal publishes accounts of new methods of experimental crop production and discussions of problems arising from the rapid expansion of agricultural production. Particular emphasis is placed on papers covering Farming Systems and Sustainability in tropical regions.

Recent articles

S. R. HARRISON, P. K. THORNTON AND J. B. DENT: The IBSNAT Project and Agricultural Experimentation in Developing Countries (Farming Systems Series - Number 26)

M. BEZUNEH AND F. J. OLSEN: Response of Beans to Fertilizer and Seed Treatment in Central Province, Zambia

K. C. REDDY, J. VAN DER PLOEG AND I. MAGA: Genotype Effects in Millet/Cowpea Intercropping in the Semi-arid Tropics of Niger

Subscription: Volume 28, 1992: January, April, July and October: £76; £38 for members of the Tropical Agriculture Association; airmail £15 per year extra. ISSN 0014-4797

Submissions: Manuscripts should
be submitted in triplicate to the
editors at the University of Guelph
at the address below. Detailed
instructions for submissions are
available and are printed on the
inside back cover of the journal.

Subscription rates:

In Canada (add 7% GST):

Institutional, \$40; Individual, \$30;
Student, \$15.

Outside Canada: Institutional:
\$45; Individual, \$35; Student, \$21.

Please forward orders with advance
payment to Journal of Agricultural
and Environmental Ethics, Room
039, MacKinnon Building,
University of Guelph, Guelph,
Ontario, Canada N1G 2W1. The
journal is published twice a year.
