

# Glasgow Mathematical Journal

## CONTENTS

<b>Coy L. May</b> , Large automorphism groups of compact Klein surfaces with boundary, I	1
<b>Lawrence M. Brown</b> , On topological spaces with a unique compatible quasi-uniformity	11
<b>P. G. Spain</b> , Support projections on Banach spaces	13
<b>A. D. Sands</b> , On relations among radical properties	17
<b>W. A. Feldman and J. F. Porter</b> , Order and Schwartz distributions	25
<b>J. Sheehan and E. M. Wright</b> , The number of Hamiltonian circuits in large, heavily edged graphs	35
<b>J. N. Lillington</b> , On polytopes with small faces	39
<b>D. H. McLain</b> , An algorithm for determining defining relations of a subgroup	51
<b>S. D. Cohen and R. W. K. Odoni</b> , The Farey density of norm subgroups of global fields (II)	57
<b>J. A. Erdos</b> , On Boolean algebras of projections	69
<b>J. P. Sproston</b> , Derivations and pure states	73
<b>Derek A. Waller</b> , Optimisation of quadratic forms associated with graphs	79
<b>J. Diestel</b> , Remarks on weak compactness in $L_1(\mu, X)$	87
<b>D. A. Jordan</b> , Primitive Ore extensions	93
<b>G. M. Habibullah</b> , A note on a pair of integral operators involving Whittaker functions	99
<b>Gloria Potter</b> , On the radical of a group algebra over a commutative ring	101
<b>Rekha Panda</b> , On a new class of polynomials	105
<b>E. J. Scourfield</b> , On the divisibility of $r_2(n)$	109

## GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 200 pages.

The prepaid subscription for each Volume is £6.50 in U.K., \$15.00 in U.S.A., post free. Single parts may be supplied at a cost of £3.50 in U.K., \$8.00 in U.S.A., net.

Copies may be ordered direct from the publishers or from any bookseller.

### *Information for Contributors*

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:

## CONTENTS

<b>Au-Yeung, Yik-Hoi and Sing, Fuk-Yum</b> , A remark on the generalized numerical range of a normal matrix	179
<b>Baird, Bridget Bos</b> , Embedding inverse semigroups of homeomorphisms on closed subsets	199
<b>Barnes, Bruce A.</b> , Representations of the $\ell^1$ -algebra of an inverse semigroup having the separation property	131
<b>Berndt, Bruce C. and Chowla, S.</b> , The reckoning of certain quartic and octic Gauss sums	153
<b>Brown, Lawrence M.</b> , On topological spaces with a unique compatible quasi-uniformity	11
<b>Chen, Lu-San</b> , A Lyapunov inequality and forced oscillations in general nonlinear $n$ th order differential-difference equations	161
<b>Choo, Koo-Guan</b> , Grothendieck groups of twisted free associative algebras	193
<b>Chowla, S.</b> , <i>See</i> Berndt, Bruce C. and Chowla, S.	153
<b>Cohen, S. D. and Odoni, R. W. K.</b> , The Farey density of norm subgroups of global fields (II)	57
<b>Colton, David</b> , A reflection principle for solutions to the Helmholtz equation and an application to the inverse scattering problem	125
<b>Crabb, M. J. and Spain, P. G.</b> , Commutators and normal operators	197
<b>Dickson, N. K.</b> , Conjugacy in groups with dihedral 3-normalisers	167
<b>Diestel, J.</b> , Remarks on weak compactness in $L_1(\mu, X)$	87
<b>Eberhart, Carl and Williams, Wiley</b> , Congruences on an orthodox semigroup via the minimum inverse semigroup congruence	181
<b>Erdos, J. A.</b> , On Boolean algebras of projections	69
<b>Feldman, W. A. and Porter, J. F.</b> , Order and Schwartz distributions	25

<b>Habibullah, G. M.</b> , A note on a pair of integral operators involving Whittaker functions	99
<b>Johnson, Johnny A.</b> , A note on regular local Noether lattices II	157
<b>Jordan, D. A.</b> , Primitive Ore extensions	93
<b>Kallaher, Michael J.</b> , Semi-field-like affine planes	113
<b>Katz, Elyahu</b> , Topological groups with co-monoid structures	145
<b>Lillington, J. N.</b> , On polytopes with small faces	39
<b>McLain, D. H.</b> , An algorithm for determining defining relations of a subgroup	51
<b>May, Coy L.</b> , Large automorphism groups of compact Klein surfaces with boundary, I	1
<b>Odoni, R. W. K.</b> , <i>See</i> Cohen, S. D. and Odoni, R. W. K.	57
<b>Panda, Rekha</b> , On a new class of polynomials	105
<b>Porter, J. F.</b> , <i>See</i> Feldman, W. A. and Porter, J. F.	25
<b>Potter, Gloria</b> , On the radical of a group algebra over a commutative ring	101
<b>Sands, A. D.</b> , On relations among radical properties	17
<b>Scourfield, E. J.</b> , On the divisibility of $r_2(n)$	109
<b>Sheehan, J. and Wright, E. M.</b> , The number of Hamiltonian circuits in large, heavily edged graphs	35
<b>Sing, Fuk-Yum</b> , <i>See</i> Au-Yeung, Yik-Hoi and Sing, Fuk-Yum	179
<b>Spain, P. G.</b> , Support projections on Banach spaces	13
<b>Spain, P. G.</b> , <i>See</i> Crabb, M. J. and Spain, P. G.	197
<b>Sproston, J. P.</b> , Derivations and pure states	73
<b>Stocks, D. C.</b> , On a dual integral equation with a trigonometric kernel	175
<b>Waller, Derek A.</b> , Optimisation of quadratic forms associated with graphs	79
<b>Williams, Wiley</b> , <i>See</i> Eberhart, Carl and Williams, Wiley	181
<b>Wright, E. M.</b> , <i>See</i> Sheehan, J. and Wright, E. M.	35
