

THE ASTIN BULLETIN

THE ASTIN BULLETIN

INTERNATIONAL JOURNAL FOR
ACTUARIAL STUDIES
IN NON-LIFE INSURANCE AND RISK THEORY

VOL. VI

THE ASTIN BULLETIN

INDEX TO VOLUME VI

Adam, J. Le Problème des Bénéfices Distribuables examiné à la Lumière du Théorème de M. de Finetti	246
Andersson, H. An Analysis of the Development of the Fire Losses in the Northern Countries after the Second World War, .	25
Banasinski, A. L'Assurance de la Propriété de l'État dans la République Populaire de Pologne.	18
Beard, R. E. On the Calculation of the Ruin Probability for a Finite Time Period.	129
Berliner, B. Correlations between Excess of Loss Reinsurance Covers and Reinsurance of the n Largest Claims	260
Bohman, H. The Ruin Probability in a Special Case	66
Bohman, H. — Grenander, U. A Mutual Reinsurance Scheme	163
Book Reviews	69, 178
Borch, K. A Short Note on overall Risk Management in an In- surance Concern.	153
Brichler, M. Étude sur la Survenance des Sinistres en Assurance Auto- mobile	86

Bühlmann, H. — Buzzi, R. On a Transformation of the Weighted Compound Poisson Process	42
Croset, G. Risque et Rentabilité	157
Delaporte, P. J. Les Mathématiques de l'Assurance Automobile (Intro- ductory Report to Subject B., Astin Colloquium at Randers)	185
Ferrara, G. Distributions des Sinistres selon leur Coût	31
Gnedenko, B. W. Random Processes and their Application to Demography and Insurance	I
Grandell, J. On Risk Processes with Stochastic Intensity Function	116
Hewitt jr., Ch. C. In Memoriam Allen L. Mayerson	183
Johnson, P. D. — Hey, G. B. Statistical Review of a Motor Insurance Portfolio . . .	222
Kupper, J. Contributions to the Theory of the Largest Claim Cover	134
Loimaranta, K. Some Asymptotic Properties of Bonus Systems . . .	233
Muff, M. The Influence of the Franchise on the Number of Claims in Motor Insurance	191

Segerdahl, C.-O.	
Astin Colloquium at Randers (Introductory Report to Subject A)	73
Stewart, C. M.	
The Assessment of Solvency	79
Straub, E.	
Application of Reliability Theory to Insurance	97
Thorin, O.	
Analytical Steps towards a numerical Calculation of the Ruin Probability for a finite Period when the Riskprocess of the Poisson Type or the more general Type studied by Sparre Andersen	54
Thorin, O.	
An Outline of a Generalization — started by E. Sparre Andersen — of the classical Ruin Theory	108
Thyrion, P.	
Remarques sur la Transformation d'une Famille de Lois de Poisson composées en Lois de Poisson par Grappes	47
Thyrion, P.	
Quelques Observations Statistiques sur la Variable "Nombre de Sinistres" en Assurance Automobile	203
Vepsäläinen, S.	
Applications to a Theory of Bonus Systems	212
Verbeek, H. G.	
An Approach to the Analysis of Claims Experience in Motor Liability Excess of Loss Reinsurance	195
