

# BECOME A LIFE MEMBER AND YOU'LL JOIN PRESTIGIOUS COMPANY

Become a Life Member of Fauna & Flora International to show an extraordinary commitment to an organisation that has been at the forefront of conservation for over 100 years.

Since its inception in 1903 as the world's first international conservation organisation Fauna & Flora International has been working tirelessly for the preservation of plants and animals across the world. For over 100 years Life Members have provided the support and commitment that has helped us to achieve so much, not least key achievements such as:

- Reintroducing the Arabian oryx to the wild
- Establishing the International Gorilla Conservation Programme
- Establishing Vietnam's first locally managed conservation organisation

Collaboration is key to our approach, and wherever possible we work with other global conservation organisations to ensure we are effective and efficient. That's why in 2015 we moved into the David Attenborough Building of the Cambridge Conservation Initiative with several other global conservation groups. Now we are asking you to be part of our wider collaborative work by becoming a Life Member.

As a Life Member you will receive *Oryx*—The International Journal of Conservation and our annual magazine *Fauna & Flora*, and you will also be invited to special events, where you can network with some of the world's leading conservationists. You will be joining a select group of supporters who have shown an extraordinary commitment to international conservation.

By joining Fauna & Flora International as a Life Member with a one-off payment of £1,500 you will be making a genuine difference to our conservation work and will forever be part of our global conservation organisation.

Gary Morrisroe/FFI

"I have been a member of Fauna & Flora International since the 1950s... investment in the work of FFI is truly an investment in the future of our planet"

Sir David Attenborough

- Cover* This issue of *Oryx* showcases the work of 10 teams of conservationists that have two things in common: at least one member of each team is an alumnus of the Conservation Leadership Programme (CLP) and has also attended a Writing for Conservation workshop. These workshops are offered jointly by CLP and the *Oryx* editorial office and take participants through the process of turning their conservation research into a manuscript ready for submission to a peer-reviewed journal. The articles, including on the sperm whale (pictured) in the Colombian Caribbean, are illustrative of the broad range of subjects that have attracted the critical attention of the Programme's alumni. For further details, see pp. 801–802 and 814–907. (Photograph © Willyam Bradberry/Shutterstock)
