

# STUDIES IN SECOND LANGUAGE ACQUISITION

## Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

**Research Article.** These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 11,000 word limit).

**Research Report.** These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Replication Study.** These manuscripts are shorter empirical studies motivated by a previously published study (not necessarily one published in *SSLA*). The background and motivation sections will necessarily be shorter compared to research articles as the maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**State-of-the-Scholarship Article.** These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 11,000-word limit of regular research articles; however, longer manuscripts may be considered on a case-by-case basis.

**Critical Commentary.** These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Methods Forum.** Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 11,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

# Studies in Second Language Acquisition

## Volume 43 Number 3 July 2021

---

### STATE OF THE SCHOLARSHIP

- Implicit Language Aptitude: Conceptualizing the Construct, Validating the Measures, and Examining the Evidence: Introduction to the Special Issue*  
Shaofeng Li and Robert DeKeyser 473–497

### RESEARCH ARTICLES

- The Associations Between Implicit and Explicit Language Aptitude and the Effects of the Timing of Corrective Feedback*  
Mengxia Fu and Shaofeng Li 498–522
- Implicitness and Explicitness in Cognitive Abilities and Corrective Feedback: A Double Dissociation?*  
Yucel Yilmaz and Gisela Granena 523–550
- A Longitudinal Investigation of Explicit and Implicit Auditory Processing in L2 Segmental and Suprasegmental Acquisition*  
Hui Sun, Kazuya Saito, and Adam Tierney 551–573
- Exploring Syntactic Priming as a Measure of Implicit Language Aptitude*  
Shaofeng Li and Jiancheng Qian 574–605
- The Contributions of Implicit-Statistical Learning Aptitude to Implicit Second-Language Knowledge*  
Aline Godfroid and Kathy MinHye Kim 606–634

### METHODS FORUM

- The Reliability and Validity of Procedural Memory Assessments Used in Second Language Acquisition Research*  
Joshua Buffington, Alexander P. Demos, and Kara Morgan-Short 635–662

### RESEARCH REPORT

- Probing the Construct Validity of LLAMA\_D as a Measure of Implicit Learning Aptitude: Incidental Instructions, Confidence Ratings, and Reaction Time*  
Yuichi Suzuki 663–676

### CRITICAL COMMENTARIES

- Why is the Componential Construct of Implicit Language Aptitude So Difficult to Capture?: A Commentary on the Special Issue*  
Pierre Perruchet 677–691
- Epilogue: Evidence for the Validity of Implicit Aptitude and the Need for Construct Validation*  
Robert DeKeyser and Shaofeng Li 692–697
