

JOURNAL of the AUSTRALIAN MATHEMATICAL SOCIETY

Series A — Pure Mathematics and Statistics
Volume 54 Part 3
JUNE 1993

S. OKADA and W. J. RICKER	<i>Non-weak compactness of the integration map for vector measures</i>	287
BRENDAN McCANN	<i>On minimal Fitting classes of periodic, infinite groups</i>	304
JAMES E. DALY and DOUGLAS S. KURTZ	<i>BMO and singular integrals over local fields .</i>	321
IAN DOUST and QIU BOZHOU	<i>The spectral theorem for well-bounded operators</i>	334
G. BUSKES and A. VAN ROOIJ	<i>The vector lattice cover of certain partially or- dered groups</i>	352
A. J. M. SNYDERS and S. VELDSMAN	<i>Ideal extensions of Γ-rings</i>	368
GRAHAM J. ELLIS	<i>Homotopical aspects of Lie algebras</i>	393

THE JOURNAL

The Journal of the Australian Mathematical Society began publication in 1959, and from 1975 has appeared in two series, Series A (Pure Mathematics and Statistics) and Series B (Applied Mathematics). Information about Series B may be found on the inside back cover.

Series A, Pure Mathematics and Statistics

Submission of research papers in pure mathematics and mathematical statistics is invited. Authors intending to submit papers for publication should prepare the typescript following the instructions below, and should send two complete copies to the Editor, or to an appropriate Associate Editor (see back cover of this issue).

Two volumes of three parts each are planned for 1993. These are Volume 54 and Volume 55. The annual subscription price to non-members is A\$237.00 (US\$180.00) for 1993.

PREPARATION OF TYPESCRIPTS

1. The author should keep a complete copy of the submitted article; the Society will not accept responsibility for any loss.

2. Each typescript should include (i) an abstract of not more than 150 words, preferably containing no formulae, and certainly containing no complicated formulae and no references, (ii) a 1991 Mathematics subject classification (Amer. Math. Soc.), (iii) if the title is long, a shortened form of it, no more than forty characters in length, including spaces.

3. The article should be typed, printed or photocopied on high quality A4 or quarto bond paper, on one side only, with at least double spacing, and with a generous margin (at least 3 cm) all around.

4. Two alternative styles for references and quotations are described below. Authors are requested to use one and only one style consistently throughout their typescript.

STYLE 1. A typical reference in the list of references would be

T. M. Cherry (1965), "Infinite linear systems with homogeneous kernel of degree -1 ", *J. Austral. Math. Soc.* **5**, 129–168.

A corresponding reference in the text would be: Cherry (1965), p. 155.

STYLE 2. A typical reference in the list of references would be

[3] L. Grüşchen, "Pseudo-quasi-ergodic theorems", *J. Austral. Math. Soc.* **4** (1960), 2–3.

A corresponding reference in the text would be: Grüşchen [3]; or ([3], [4], [9]); or Grüşchen [2, 3]; or Grüşchen [3, Theorem 1].

In either style, the list of references should be in alphabetical order of surnames of first authors.

5. Explain clearly what symbols are to be set in special typefaces (such as cursive, fraktur, script, bold) and what is required with any unusual symbols (which should wherever possible be chosen from symbols available to the printer).

6. Avoid abbreviations, such as Thm., Prop., Ex., iff, i.e., e.g., \forall , \exists , \Rightarrow , and \Leftrightarrow .

7. Authors should provide diagrams (except for category theory type diagrams), drawn to professional standards.

8. Authors are encouraged to submit their papers in \LaTeX .

Journal of the Australian Mathematical Society, Series A — Pure Mathematics and Statistics, is published bimonthly by the Australian Mathematical Society, c/-Department of Mathematics, University of Queensland, Qld. 4072, Australia. Second class postage is paid at Ann Arbor, Michigan 48106. Postmaster: Send address change notices to Dr. B. D. Jones, Australian Mathematical Society, c/-Department of Mathematics, University of Queensland, Qld. 4072, Australia.
