Environment and Development Economics

Published in association with the Beijer Institute of Ecological Economics, Royal Swedish Academy of Sciences

Editors

Anastasios Xepapadeas, Athens University of Economics and Business, Greece

Environment and Development Economics is positioned at the intersection of environmental, resource and development economics. The Editor and Associate Editors, supported by a distinguished panel of advisors from around the world, aim to encourage submissions from researchers in the field in both developed and developing countries. The journal is divided into two main sections, Theory and Applications, which includes regular academic papers and Policy Options, which includes papers that may be of interest to the wider policy community. *Environment and Development Economics* also publishes Policy Fora (discussions based on a focal paper) and Book Reviews. From time to time the journal publishes special issues based on a particular theme.

Environmental Practice

Published for the National Association of Environmental Professionals

Editor

Tim Stretton, *Saint Mary's University, Canada*

Environmental Practice provides a multidisciplinary forum for authoritative discussion and analysis of issues of wide interest to the international community of environmental professionals, with the intent of developing innovative solutions to environmental problems for public policy implementation, professional practice, or both. Peer-reviewed original research papers, environmental reviews, and commentaries, along with news articles and points of view, link findings in science and technology with issues of public policy, health, environmental quality, law, political economy, management, and the appropriate standards for expertise.

Fruits

Marketed and distributed on behalf of ÉDP Sciences

Editor-in-Chief

Chantal Loison, Cirad, France

Fruits is a scientific journal for original articles and reviews on fruit crops in temperate, Mediterranean, subtropical and tropical regions. The journal, published in association with CIRAD, covers a wide range of subjects, such as agronomy, physiology, genetics, crop protection, postharvest storage, product processing and marketing. In each issue, *Fruits* also presents a list of forthcoming meetings and new books published on the fruit topics.

Plant Genetic Resources

Published on behalf of the
National Institute of Agricultural Botany (NIAB)

Editor-in-Chief

Robert Koebner, *CropGen International, UK*

Plant Genetic Resources is an international journal that brings together the many diverse topics concerned with plant genetic resources. Each issue provides access to peer-reviewed research papers on genetic variation in plants, both crop and non-crop, as well as on the technical, socio-economic, legal and geopolitical aspects of PGR. Many papers feature research directed to endangered non-crop and medicinal plants. The journal is of interest to researchers and scientists involved in the plant genetic resources community, including: breeders, all those with an interest in germplasm, policy makers, consultants and research students.

BJN

BRITISH JOURNAL OF NUTRITION

Editor-in-Chief

G C Burdge, *University of Southampton, UK*

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multi-disciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology, and the emerging area of nutritional genomics.

Experimental Agriculture

INSTRUCTIONS TO CONTRIBUTORS

Electronic Submission of Manuscripts

Contributions for consideration for publication should be submitted online at <http://www.editorialmanager.com/eag>

Editorial Policy

With a focus on the tropical and sub-tropical regions of the world, *Experimental Agriculture* publishes the results of original research on field, plantation and herbage crops grown for food or feed, or for industrial purposes, and on farming systems, including livestock and people. It reports experimental work designed to explain how crops respond to the environment in biological and physical terms, and on the social and economic issues that may influence the uptake of the results of research by policy makers and farmers, including the role of institutions and partnerships in delivering impact. The journal also publishes accounts and critical discussions of new quantitative and qualitative methods in agricultural research, and of contemporary issues arising in countries where agricultural production needs to develop rapidly. There is a regular book review section and occasional, often invited, reviews of research. Most papers are published within six months from acceptance.

The minimum standards for a paper to be considered by the Editor and the referees are set out below:

- The title page, all headings and the references must conform to the style of *Experimental Agriculture*.
- Each table and figure must be cited in the text of the typescript.
- All figures to be supplied as separate TIFF or EPS files wherever possible.
- The statistical treatment of experimental data must conform to the instructions given in Riley, J. (2001). Presentation of statistical analyses. *Experimental Agriculture* 37: 115–123.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.
