THINKING *Directed, undirected and creative*

K.J. Gilhooly

1982, 188pp., \$11.50/£9.50 (UK only), ISBN: 0.12.283482.8

Thinking is an intriguing and puzzling activity. In this book Dr Gilhooly reviews recent theory and research aimed at increasing our understanding of thought processes. He focusses on thinking in normal adults, particularly: *directed thinking* as found in problem solving and reasoning; *undirected thinking* as found in daydreaming; *creative thinking*; and examines these within the modern information processing framework.

The introductory chapter gives an historical perspective on the study of thinking, outlining the approaches of classical introspectionism, early behaviourism, Gestalt, neo-behaviourism, and information processing. Subsequent chapters discuss how information processing models, currently dominant in cognitive psychology, stand up against data from recent psychological research on adversary and non-adversary problem solving, deductive and inductive reasoning, daydreaming and creative thinking.

PHYSIOLOGICAL CORRELATES OF HUMAN BEHAVIOUR *Volumes 1, 2 and 3*

Edited by Anthony Gale and John A. Edwards

Volume 1: Basic Issues

March 1986, 368pp., \$30.00/£12.50 (UK only), ISBN: 0.12.273904.3

Volume 2: Attention and Performance

March 1986: 272pp., \$30.00/£12.50 (UK only), ISBN: 0.12.273905.1

Volume 3: Individual Differences and Psychopathology

March 1986, 308pp., \$30.00/£12.50 (UK only), ISBN: 0.12.273906.X

Special Set Price: \$50.00/£30.00 (UK only)

These volumes bring together the various research traditions which have contributed to our understanding of the physiological bases of human behaviour. As such they will provide an invaluable source of reference for new researchers, for students and their teachers, in psychology departments and in psychiatry and clinical psychology training programmes.

It is intended that the specially commissioned state-of-the-art reviews in these volumes will provide an entry to the research literature especially in psychophysiology. They will also be useful additional reading for students using texts of physiological psychology many of which still concentrate on animal work.

EVERYDAY MEMORY, ACTIONS AND ABSENT-MINDEDNESS

J.E. Harris and P.E. Morris

February 1986, 240pp., \$30.00/£12.50 (UK only), ISBN: 0.12.327641.1

This volume brings together a number of important themes in the study of memory, several of which have been inadequately covered in the literature, and reflects the increasing trend of research in more naturalistic and practical studies of memory.

Incorporating a number of interrelated focusses, the various chapters look at issues involved in taking memory research out of the laboratory, memory for people and places, tip of the tongue phenomena, remembering to do things or "prospective" memory as it is increasingly becoming known, planning and controlling actions, cognitive failure questionnaires and subjective data assessment, and finally the practical clinical aspects of everyday memory research in assessment, rehabilitation and medical compliance.

Now you can give an answer to those seeking self-help

The author's model of Positive Psychotherapy is a synthesis of psychodynamics and behavior therapy that focuses on the positive aspects of conflicts and sufferings. He offers transcultural perspectives in the form of proverbs, myths and fables in which the patient may recognize himself in allegorical terms and thus be able to establish a new form of self-confidence and security.

Clearly written, novel, and optimistic, these books not only offer therapists and general practitioners valuable ideas for treatment, but will also help interested layreaders trying to come to terms with their own problems in everyday life.

N. Peseschkian

Psychotherapy of Everyday Life

Training in Partnership and Selfhelp with 250 Case Histories

1986. XIV, 250 pages. Soft cover approx. £ 5.35. ISBN 3-540-15767-0

Psychotherapy of Everyday Life illustrates day-to-day conflicts that occur in partnerships, how they arise from misunderstandings and how the layman can deal with them.

N. Peseschkian

Positive Family Therapy

The Family as Therapist

1986. X, 338 pages. Soft cover approx. £ 7.95
ISBN 3-540-15768-9

Positive Family Therapy focuses on the given capacity of the family as a whole to deal with conflicts within the family and the afflictions of its members through group discussion.

Review of the German edition:

"Many of the afflictions of patients are actually caused (or even exploited!) by their relatives. In this case the whole family should undergo therapy. Peseschkian gives guidance as to how the family can treat itself through group discussion. The book is very clearly written. It offers the practitioner valuable ideas and is also suitable as a guide to anyone trying to get to grips with his own conflicts."

In Search of Meaning

A Psychotherapy of Small Steps

1985. XIV, 201 pages. Soft cover approx. £ 5.35
ISBN 3-540-15766-2

In Search of Meaning shows that individuals suffering from a loss of meaning cannot find what they are looking for in a global concept, but rather must first take small steps to find the meaning behind single actions.

In preparation:

N. Peseschkian: **Positive Psychotherapy**

1986. ISBN 3-540-15794-8

N. Peseschkian: **Positive Psychotherapy in Psychosomatics**

1986. ISBN 3-540-15769-7

Instructions to Authors

1. **Submission.** Articles, written in English and not submitted for publication elsewhere, should be sent to Dr A. Desmond Poole, Department of Mental Health, The Queen's University of Belfast, Windsor House, Belfast City Hospital, Belfast BT9 7AB, Northern Ireland.

2. **Manuscript preparation.** Four complete copies of the manuscript must be submitted. Original figures should be supplied at the time of submission. Articles must be typed double-spaced throughout on standard sized paper (preferably A4) allowing wide margins all round. Where unpublished material, e.g. behaviour rating scales, therapy manuals, etc is referred to in an article, copies should be submitted to facilitate review.

Manuscripts will be sent out for review exactly as submitted. Authors who want a blind review should mark two copies of their article "review copy" omitting from these copies details of authorship.

Abbreviations where used must be standard. The Systeme Internationale (SI) should be used for all units; where metric units are used the SI equivalent must also be given. Probability values and power statistics should be given with statistic values and degrees of freedom [e.g. $F(1, 34) = 123.07, P < 0.001$], but such information should preferably be included in tables rather than the main text.

Spelling must be consistent within an article, either using British usage (*The Shorter Oxford English Dictionary*), or American usage (*Webster's New Collegiate Dictionary*). However, spelling in the list of references must be literal to each original publication.

Details of style not specified here may be determined by reference to the *Publication Manual of the American Psychological Association* or the *Style Manual for Biological Journals*.

Articles should conform to the following scheme:

- (a) *Title page.* The title should phrase concisely the major issues. Author(s) to be given with departmental affiliations and addresses, grouped appropriately. A running head of no more than 40 characters should be indicated.
- (b) *Summary.* This should summarize the article in no more than 200 words.
- (c) *Text.* This should begin with an introduction, succinctly introducing the point of the paper to those interested in the general area of the journal. References within the text should be given in the form Jones and Smith (1973). Three or more authors should be given as Williams *et al.* (1973). Authors of the same surname should be distinguished by their initials. The approximate positions of tables and figures should be indicated in the text. Footnotes should be avoided where possible.
- (d) *Reference notes.* A list of all cited unpublished or limited circulation material, numbered in order of appearance in the text, giving as much information as possible about extant manuscripts.
- (e) *References.* All citations in the text should be listed in strict alphabetical order according to surnames. Multiple references to the same author should be listed chronologically, using a, b, etc., for entries within the same year. Formats for journal articles, books and chapters should follow these examples:
BECKER, M. R. and GREEN, L. W. (1975). A family approach to compliance with medical treatment: A selective review of the literature. *International Journal of Health Education* 18, 173—182.
THORP, R. G. and WETZEL, R. J. (1969). *Behaviour Modification in the Natural Environment*. New York: Academic Press.
ROSKIES, E. and LAZARUS, R. S. (1980). Coping theory and the teaching of coping skills. In *Behavioural Medicine: Changing Health Lifestyles*. P. O. Davidson and S. M. Davidson (Eds), New York: Brunner/Mazel.
- (f) *Footnotes.* The first, and preferably only, footnote will appear at the foot of the first page of each article, and subsequently may acknowledge previous unpublished presentation (e.g. dissertation, meeting paper), financial support, scholarly or technical assistance, or a change in affiliation. Its concluding (or only) paragraph must be the name and full mailing address of the author to whom reprint requests or other inquiries should be sent.
- (g) *Tables.* Tables should be numbered and given explanatory titles.
- (h) *Figure captions.* Numbered captions should be typed on a separate page.
- (i) *Figures.* Original drawings or prints must be submitted for each line or half-tone illustration. Figures should be clearly labelled.

3. **Proofs, Reprints and Copyright.** Proofs of accepted articles will be sent to authors for the correction of printers' errors; author's alterations may be charged. Authors submitting a manuscript do so on the understanding that if it is accepted for publication exclusive copyright in the paper shall be assigned to the Society. In consideration of the assignment of copyright, 25 copies of each paper will be supplied. Further reprints may be ordered at extra cost; the copyright assignment form and the reprint order form will be sent with the proofs. The publishers will not put any limitation on the personal freedom of the author to use material contained in the paper in other works.
