EDITOR: Elaine L. Larson, RN, PhD, FAAN, CIC

AJIC covers key topics and issues in infection control and epidemiology. Infection control professionals, including physicians, nurses, and epidemiologists, rely on **AJIC** for peer-reviewed articles covering clinical topics as well as original research. As the official publication of the *Association for Professionals in Infection Control and Epidemiology, Inc. (APIC)*, **AJIC** is the foremost resource on infection control, epidemiology, infectious diseases, quality management, occupational health, and disease prevention. **AJIC** also publishes relevant infection control guidelines. **AJIC** is included in Index Medicus and CINAHL.

Official Publication of the Association for Professionals in Infection Control and Epidemiology, Inc.

National Guard Health Affairs Hospitals

INFECTION PREVENTION AND CONTROL PROGRAM

National Guard Health Affairs – King Abdulaziz Medical City is considered as flagship facility in the Middle East, JCI accredited hospital, providing primary and tertiary healthcare services to the National Guard forces, their dependents and civilian employees. As a Center of Excellence, it performs all major surgeries – including cardiac surgery, liver transplants, and conjoined twin separation.

The Department of Infection Prevention and Control (IP&C) in KAMC Riyadh is a corporate department that oversees and collaborates with the IP&C departments of the Western and Eastern Regions. IP&C Departments are comprised of three main sections: Public Health Section, Hospital Infection Control Section, and Environmental Health and Occupational Health and Safety Section. Each section has its own activities and provides specific services to the hospital, affiliated clinics and/or communities in the central region, eastern and western Saudi Arabian National Guard (SANG) regions.

We are currently inviting applications for the following post:

KAMC Riyadh

Deputy Executive Director – Infection Prevention and Control Program and a Director – Hospital Epidemiology

Our requirement in terms of academic qualification is as follows:

- US Board / North American trained in Pediatrics or Internal Medicine
- Fellowship Training in Infectious Diseases
- 5 years experience in Infection Control at a Tertiary care hospital

We in turn can offer a generous tax-free salary, 50-day holidays, and educational support for your children, free flights at start and end of your contract, and of course a high quality accommodation. The consultant will do 18 shifts per month with flexible scheduling.

If you are interested please e-mail your CV indicating which journal advert you are responding to, along with copies of your certificates to the recruitment office of NGH-A-KAMC, for the attention of Mr. John Quinn at email address: quinnj@ngha.med.sa, or fax# +966-1-2520056.

About SHEA

The Society for Healthcare Epidemiology of America (SHEA) was founded in 1980 to advance the science of healthcare epidemiology and infection prevention. SHEA works to maintain the utmost quality of patient care and healthcare worker safety in all healthcare settings, applying epidemiologic principles and prevention strategies to a wide range of quality-of-care issues. SHEA is strengthened by its active membership in all branches of medicine, public health, and healthcare epidemiology. The Society's expertise is sought by healthcare regulatory and accrediting agencies, and its scientific voice is influential in guiding decision-making bodies towards rational, effective, cost-conscious policies.

Mission

SHEA's mission is to prevent and control healthcare-associated infections and advance the field of healthcare epidemiology.

Core Values

SHEA as an organization:

- Advances the science of healthcare epidemiology through research and education
- Translates knowledge into effective policy and practice
- Mentors, trains and promotes professional development in healthcare epidemiology
- Collaborates and shares expertise with other organizations
- Adheres to high ethical standards and promotes honesty and ethical principles in the practice of epidemiology

Areas of Focus

- Epidemiologic research and laboratory investigation
- Applying the best evidence for protecting patients and reporting data
- Risk reduction programs focused on device and procedure management
- Policy development and implementation
- Education and information

Please contact info@shea-online.org with membership inquiries.
