Safety standards for invasive procedures in out-patient departments, managing subglottic stenosis in pregnancy, a critical review on follow up of head and neck cancer patients, and a new classification for cochleovestibular malformations – ERRATUM

Musheer Hussain, Jonathan Fishman and Edward Fisher

DOI: <https://doi.org/10.1017/S0022215119001129> Published online by Cambridge University Press 11 June 2019

In the above Editorial (Hussain, M., Fishman, J., & Fisher, E. 2019), the words “have become important” were omitted from the first paragraph. The correct sentence should read:

“The inception of the World Health Organization check list has transformed the way surgeons operate around the world. The emphasis has hitherto been on in-patient procedures, with the increase in out-patient based operative procedures in the British Isles check lists to avoid errors have become important.”

The publishers apologise for this error.
